

## DEVELOP A PYTHON SCRIPT

Team ID	PNT2022TMID48141
Project Name	Personal Assistant for senior people who are self-reliant

SCRIPT:

```
a=int(input())
;b=int(input()) c=a+b
print ("The sum is",
c)
```

The screenshot displays the PyCharm IDE interface. The main editor window shows a Python script named `main.py` with the following code:

```
1 a=int(input())
2 b=int(input())
3 c=a+b
4 print("The sum is", c)
```

The script has been executed, and the output is visible in the Run console at the bottom. The console shows the command used to run the script and the resulting output:

```
Run: C:\Users\HP\PycharmProjects\IBM\venv\Scripts\python.exe C:/Users/HP/PycharmProjects/IBM/main.py
4
3
The sum is 12
Process finished with exit code 0
```
